

# SnapShot + Editorial Manager®

Inconsistent journal standards, limited transparency, compliance discrepancies, time-consuming manual checks, and a rise in fraud can lead to expensive workflow delays, post-publication retractions, and threats to research integrity.

The seamless integration between Editorial Manager® (EM) and DataSeer SnapShot offers publishers an automated integrity check solution that enables efficient article screening at scale early in the editorial workflow and strengthens research quality.

## Powerful Screening

Data, code, and protocol sharing

Preprint posting

Repositories and other sharing locations

Presence of PIDs

## Customized Checks

- ✓ Rapid, accurate, and sophisticated AI-powered manuscript analysis
- ✓ Flexible checks tailored against each journal's unique needs and policies
- ✓ Criteria for LLM schemas continuously refined based on journal feedback

## Integrity-Driven Reports

- ✓ Generates research integrity score with itemized reports accessible in EM
- ✓ Actionable feedback for Editors and Author-ready revisions and corrections
- ✓ Improves research quality, transparency, and compliance with journal/funder policies

## Seamless Automation

- ✓ Automatically scans full text of manuscripts at submission and revision
- ✓ Streamlines screening and manuscript triage to advance papers to peer review
- ✓ Saves Editors time and reduces administrative burden of manual checks
