

# Welcome to EEMUG 2016

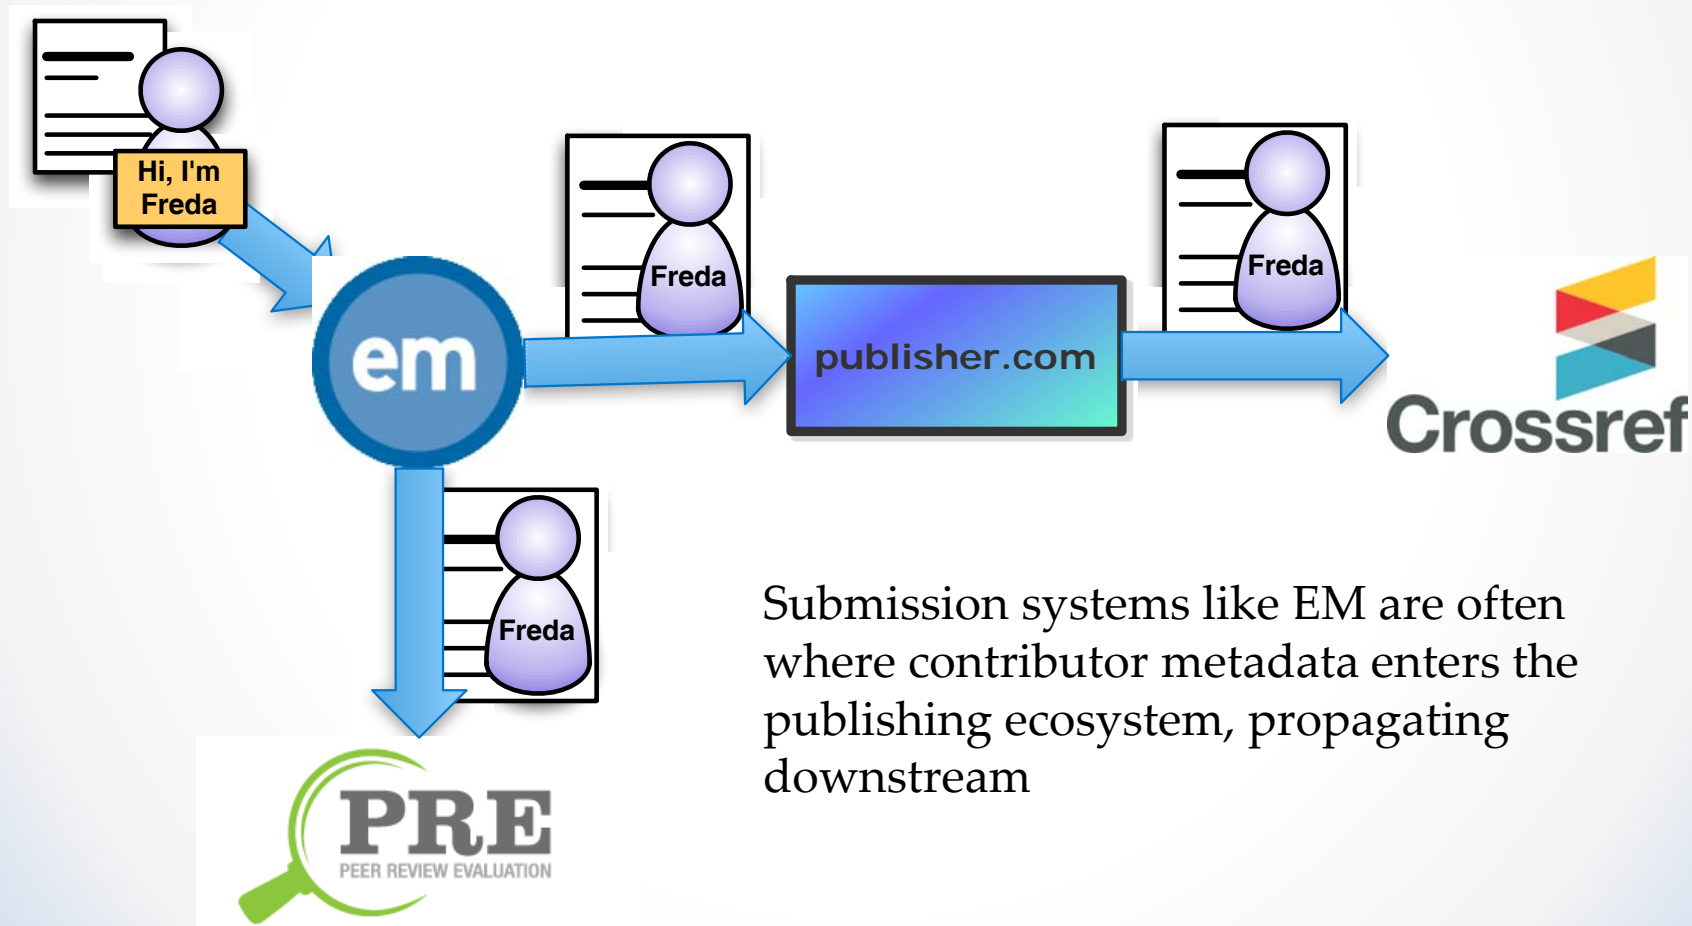

**em** Editorial Manager®  
[www.ariessys.com](http://www.ariessys.com)

**Aries**  
systems  
Publish Faster. Publish Smarter.

# Contributor Recognition

PRE, CRediT and ORCID Reviewer Activity

# EM: First Point of Contact

Submission systems like EM are often where contributor metadata enters the publishing ecosystem, propagating downstream

# PRE and PRE-val

Assessing the Quality of Peer Review

# Example: PRE

- Peer Review Evaluation
  - was PRE-Score, now PRE-Val
- Independent assessment of quality of peer review carried out by publications
  - Based on metadata from Peer Review systems
  - Articles get 'badge'; link through to summary of peer-review activities actually done
  - Available from point of publication
- Details of submission, reviewers and Editors passed to PRE-val.org to compile summaries
  - EM/PM can be configured to do this automatically, e.g. on Acceptance

**Publisher Manuscript Submission &  
Peer Review Tracking System**

`<metadata> PEER REVIEW </metadata>`

**PRE API**

**Publisher places badge on:**

- **Journal article page**
- **Search results**
- **Aggregator sites**
- **Article metrics**
- **Anywhere else a signal of peer review is important**

J B J S

# The Journal of Bone & Joint Surgery

## Peer Review Details

DOI: 10.2106/JBJS.M.01233

- Method of review: **Double-Blind**  
<http://jbj.org/content/jbj-consultant-reviewer-guidelines>
- Rounds of review prior to acceptance: **4**
- Article screened for plagiarism prior to acceptance?: **YES**
- Date of original submission: **2013-09-10**
- Date accepted: **2015-01-05**

### Roles who reviewed

Editor In Chief:	2
Deputy Editor:	1
Statistics Editor:	1
Reviewer:	4

This journal adheres to guidelines provided by the following organizations and employs services which reflect best practices in scholarly publishing.

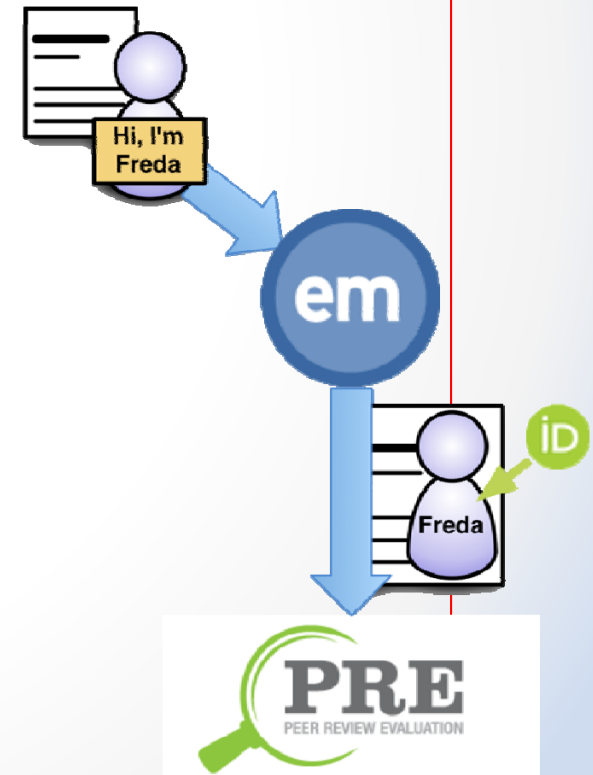

# EM & PRE-Val

- Transfer tied to Production Task; assign task to send information to PRE-val.
- However, new option to allow non-PM customers to have 'limited' production functionality
  - Setting FD can then trigger PRE-Val deposit.
- EM packages up *all* metadata required; *all* submission, revision, editor and reviewer details.
  - Publication's agreement with PRE-val.org determines what is then made public.

# Sample data sent

# Configuration

Aries admins enable PRE

**Production Tracking**

- Enable Production Tracking
  - Limited Use Only
- Enable PRE-score Export

**FTP Upload**

FTP Upload Profile:

Existing (optional) Article Type configuration to set FD

**Production Tracking Parameters:**

Use Submission Workflow:

- Automatically set the Final Disposition to 'Accept' when the Author is notified of the selected Decisions:
- Automatically set the Final Disposition to 'Reject' when the Author is notified of the selected Decisions:

## Configure Automatic Production Initiation

Regular Submissions:	<input checked="" type="checkbox"/> Initiate Production upon Setting Final Disposition to 'Accept'
	<input type="checkbox"/> Initiate Production upon Setting Final Disposition to 'Accept on Submission'
Conference Submissions:	<input type="checkbox"/> Initiate Production upon Setting Final Disposition to 'Accept and Transmit'

Existing option to Initiate Production automatically

Configure Production Task to trigger and send data to PRE-val

**Assignment Options**

Automatic Assignment can be triggered by the actions listed below. Because this process occurs automatically and a specific user to receive the task. You should also configure one or more File types to be automatically selected.

- Assign Automatically when Production is initiated (if this is the first task in the workflow)
- Assign Automatically when previous Task is completed

Automatic End Production when the Task is Completed and there are No Other Open Tasks in the Workflow.

- End Production after this task is Completed

Batch Assignment can be triggered on either a set of submissions selected from the Search Submissions Results selected from the Manage Schedule Groups folder. Only tasks that are specifically configured to allow batch assignment.

# ORCID iD

Standard Identifier for Researchers/Contributors

# ORCID iD

- Independent registry of unique identifiers for people active in academic publishing
- Sign up, get identifier PLUS associated Record
- Publishing industry gets benefits of disambiguation
- Individual gets benefits of formal recognition through:
  - Association of their ORCID iD with their published works
  - Updates of their ORCID record by authorized third parties

# EM & ORCID

- Aries was an early adopter
- ORCID implementation has evolved over time
- ORCID is gaining momentum. And note:

“We, the following journals and publishers, starting in 2016 shall be requiring ORCID iDs for authors, according to the best practices laid out above. We encourage other publishers to join us in this initiative. We hope that our action inspires the community, including researchers, research funders, and research institutions, to join us in adopting ORCID and making it easy for researchers to connect their iD to their contributions and affiliations.”

*– from Open Letter published on ORCID website, Jan 2016.*

*eLife, PLoS and The Royal Society were the initial signatories, with 5 more publishers subsequently adding their signatures, at the time of writing.*

# Where in the Workflow?

- So far, ORCID iD entry/retrieval has been added to:
  - Registration Fields and Other Author fields
  - Submission workflow and Co-Author Validation ('Authenticated' iDs only; no text entry)
  - Other functionality where an ORCID is collected first.
    - – e.g. ORCID SSO
- Planned:
  - Through Registration using ORCID Record metadata
  - New Deep link usable in any letter

ISNI

ORCID \*

Software Copyright © 2016 Aries Systems Corporation. [Private](#)

# Trusting the ORCID

Fetch/Register link: user is logged into EM when an OAuth request is issued.

ISNI	<input type="text" value="0000-0003-2647-5154"/>	Fetch/Register
ORCID *	<input type="text"/>	
	<a href="#">What is ORCID?</a>	
PubMed Author ID	<input type="text"/>	
ResearcherID	<input type="text"/>	
Scopus Author ID	<input type="text"/>	

ISNI	<input type="text" value="0000-0003-2647-5154"/>	Delete
ORCID *	<input type="text" value="0000-0003-2647-5154"/> 	
PubMed Author ID	<input type="text"/>	
ResearcherID	<input type="text"/>	
Scopus Author ID	<input type="text"/>	

So we are confident this EM user 'owns' the associated ORCID Record.

0000-0003-2647-5154

And also has to log into their ORCID Record to get their iD sent to EM.

# 'Authenticated' is key

- Functionality relies on 'Authenticated' status:
  - E.g. an Authenticated ORCID iD is needed for ORCID Single Sign-On to work.
  - If not Authenticated, ORCID is not included in some exports/transmittals (only where there is an 'Authenticated' attribute.
  - So vital for identifying contributors.
- New checks for existing 'duplicate' records being built around the presence of Authenticated ORCID iDs.

# Maximizing Authentication

- Enable ORCID Request for Corresponding Authors on submission
- Enable Co-Author Verification, and enable ORCID Request during verification
  - Disable ORCID iD under 'Set Other Author Parameters'
- Hide ORCID iD under Proxy Registration (new)
- Use Author Status page to review Author ORCID IDs & chase
- Suggest SSO as a benefit
- New functionality on the way to help!
  - To enforce Authentication when registering
  - To prompt any letter recipient to Authenticate an ORCID iD if they don't already have one

# Coming Up

...

New ORCID-related improvements in 13.x and beyond

# New Features in 13.x

- New setting to enforce Authenticated ORCID's when registering
- New Deep Link for inclusion in any letter
  - Displays ORCID if Authenticated, link to Authenticate if not
- Option to Register via ORCID
  - Same basic interaction as retrieving ORCID now, but returns additional ORCID metadata:
  - Name; E-Mail; ORCID iD; Keywords; Institute address

## New Edit Registration Fields setting disables ORCID Text Edit box, forcing use of Fetch/Register

<http://dx.doi.org/10.1007/s002080050034>

CrossRef would like your permission to interact with your ORCID Record as a trusted party?

[Archive without granting permissions](#)
[Grant permissions](#)

**About CrossRef**  
 Establishes an author's claim when a work is deposited with CrossRef.

You have received this message because you have opted in to receive notifications from organizations that help maintain the information in your ORCID record. [Learn more about how the process works.](#)

ORCID Inbox:  
 Allows 'offline' request  
 for permission to  
 update an ORCID.

ORCID E-mails the  
 user, who comes in to  
 authorize it.

CrossRef now has  
*ongoing* permission to  
 update this ORCID  
 Record in future.

# CRedit

Standardizing and Expanding Contributor Attribution

# CRedit

- Contributor Roles Taxonomy
- CASRAI activity to develop a way to classify contributor roles
  - Working Group delivered a taxonomy of 14 Roles
- Expanding attribution beyond Corresponding Author/Co-Author
- EM will collect these
- ORCID will support the taxonomy
  - So more contributors, not just authors, can be recognized by updating their ORCID Record

# CRedit Taxonomy

1. Conceptualization
2. Data curation
3. Formal analysis
4. Funding acquisition
5. Investigation
6. Methodology
7. Project administration
8. Resources
9. Software
10. Supervision
11. Validation
12. Visualization
13. Writing – original draft
14. Writing – review & editing

Also optional ‘Degree of Contribution’: Lead, Equal or Supporting

# CRedit in EM

- Available to all customers
  - Configured per Other Author fields, but has mandatory/optional set by Article Type
- Submitting Author sets Roles for each author they add
  - Including 'Degree of Contribution' if enabled
- Displayed where 'authors' were previously listed
- Output in transmittals
