

Introduction

Editorial Manager® Ingest seamlessly integrates submission partners and *Editorial Manager* deployments. Ingest allows value-added manuscript services used by authors to flow submissions right into EM queues. For journals, there is no configuration needed to begin receiving these high-quality submissions, along with cleaner metadata, for consideration.

Ingest Service

Prior to submission, authors frequently use a range of manuscript services to assist with document preparation including bibliography management, collaborative authoring tools, language polishing, and journal selection services. Without configuring anything, these submission partners can now automatically transfer manuscripts to *Editorial Manager* journal submission queues, thereby increasing quality submissions along with higher quality metadata, and offering a streamlined process to authors using these services.

Standards Integrated

This new *Editorial Manager* service leverages the U.S. National Library of Medicine's Journal Article Tag Suite (JATS) standard DTD (version 1.0 and up) to facilitate ingest of metadata in a standardized format. This means that EM Ingest can be used to ingest submissions from other peer-reviewed journals, value-added manuscript services providers, and to create publisher-branded, front-end submission portals.

The ingest service can also (optionally) make use of Ringgold and ORCID® identifiers to ensure that transferred submissions are accurately mapped to prior author registration records in EM.

Frequently Asked Questions

Q: What do I have to do to begin taking advantage of EM Ingest?

A: Nothing at all! This feature is included in the release of 12.0 for all EM users. Talk about a quick win!

Q: How is this different from submission partners manually submitting papers on behalf of their author customers?

A: It's no different - but it is streamlining the workflow, and capturing higher quality metadata for submissions.

Q: What if I prefer not to accept submissions from one of the service providers?

A: No problem! You can deactivate a service provider without interrupting the flow of submissions from others.

OPTION 1 Author submits directly to journal

OPTION 2 Author submits via a Submission Partner

Examples:

- Language editing service
- Pre-peer review service
- Journal selection service
- Publisher branded portal
- Collaborative authoring tool
