# Display Additional People Detail Fields on Editor Selection Summary Page

**User role impact: EDITOR**

**This enhancement applies only to publications configured to use the Suggest Editor feature.** Using this method of Editor assignment, EM suggests to the user a prioritized list of Editor candidates based on a specified set of criteria. The user selects candidates from the queue, and then the system automatically sends out one or more invitations at configurable intervals until an Editor agrees to handle the submission.

Some publications use Additional People Detail (APD) fields to capture information about Editors' expertise. This enhancement allows a system administrator to configure one or more APD fields to display directly on the Editor Selection Summary page, providing additional valuable information to help the user decide which Editors to add to the invitation queue.

**Detail of Editor Selection Summary page with two APDs configured to display.**

The screenshot shows a table of candidates with the following columns: Select, Invitation Order, Editor Role, Editor Name, Institution, Classification Matches, Current Assignments, Open Invitations, Available during next 21 days, Hobbies, and Areas of Interest. The 'Hobbies' and 'Areas of Interest' columns are highlighted with a green box, showing values like 'Yoga' and 'Cardiology'.

Select	Invitation Order	Editor Role	Editor Name	Institution	Classification Matches	Current Assignments	Open Invitations	Available during next 21 days	Hobbies	Areas of Interest
<input checked="" type="checkbox"/>	1	Deputy Editor	Robert Reef, M.D.	Massachusetts General Hospital	0	4	2	Yes	Yoga	Cardiology
<input checked="" type="checkbox"/>	2	Deputy Editor	Virginia S. Valley, Ph.D.	Case Western Reserve University	0	6	0	Yes		Cardiology
<input checked="" type="checkbox"/>	3	Member Editor	Dennis Dune, M.D.	Massachusetts General Hospital	0	1	0	Yes		

## TO CONFIGURE:

Go to **PolicyManager** > Additional Data Policies > Add/Edit Additional People Detail Fields. Add a new APD or edit an existing APD. In the Options section, set Editor Selection Summary drop-down selector to Read Only.

**Detail of Add/Edit Additional People Detail Field page: Options section includes setting to display the APD on the Editor Selection Summary page. This setting appears only when the publication has the Suggest Editor feature enabled.**

The screenshot shows the 'Options' section with a table for configuring APD fields. The 'Editor Selection Summary' row is highlighted with a green box, showing a dropdown menu with 'Read Only' selected.

Page	Visibility	Help Text
Additional People Details	Editable	
Search People - Update Information	Read Only	
People Activity Details	Read Only	
Transmittal Form	Read Only	
Editor Selection Summary	Read Only	

# EM Notification Services Enhancement

## User role impact: SYSTEM ADMINISTRATOR

EM Notification Services allow system administrators to configure their publication site to send notifications to predefined endpoints at specific workflow events. This enhancement adds two Manuscript Submission events to configuration options:

- Technical Check Complete
- Editorial Transmittal Complete

## TO CONFIGURE:

Go to **AdminManager** > Configure Notification Services.

The Manuscript Submission section of the page now includes the Technical Check Complete and Editorial Transmittal Complete events. System administrators must add endpoints to be notified for the new events.

# Reporting Enhancements

## EAR/XEAR ChronosHub Reports

Enterprise Analytics Reporting (EAR) and Cross-Publication Enterprise Analytics Reporting (XEAR) feature a new ChronosHub Report in the Third Party Exports section. These reports facilitate the transfer of data related to accepted submissions to ChronosHub. Both reports will return fields related to all authors of all submissions that were accepted by the publication within the last seven days. Reports should be scheduled to send via SFTP (using an address provided by ChronosHub).

ChronosHub is an independent Manuscript Service Provider (MSP) that offers a Journal Finder service to authors. To learn about ChronosHub's services, visit the ChronosHub website:

<https://chronoshub.io/services/publishers/>

### TO CONFIGURE:

No configuration is necessary for displaying the report. Users with reporting permissions on a publication using EAR or XEAR will see this new report in the Third Party Exports section.

A system administrator must enable ChronosHub for use as an MSP.

## EAR/XEAR Accepted Manuscripts and Authors Views

The Accepted Manuscripts and Authors View is introduced for use with single-publication Enterprise Analytics and Custom Reporting. The Cross-Publication Accepted Manuscripts and Authors View is available for Cross-Publication Enterprise Analytics Reporting. The views return data on all authors of all accepted submissions

### TO CONFIGURE:

No configuration is necessary. Users with reporting permissions will see the new view in Custom Reports. Users with reporting permissions on a publication using EAR or XEAR will also have access to the new view through those menus.
