# Option to Display DOI Assigned by Repository

User role impact: EDITOR, PUBLISHER

This enhancement applies to publications configured for automatic assignment of Digital Object Identifiers (DOIs).

When automatic DOI assignment is enabled, Submission Item Types can be configured for automatic DOI assignment. Submission Item DOIs are assigned by the system and are displayed on the File Inventory page.

This enhancement introduces the option to display the DOI assigned by a repository instead of a system-assigned Submission Item DOI for supplementary items uploaded to a repository. When a supplementary Submission Item Type is configured to use this option, the DOI assigned by the repository will be displayed in the Submission Item DOI column on the File Inventory page.

Detail of File Inventory page: The DOI assigned by a repository will be displayed in the Submission Item DOI column when a Submission Item Type is configured with the new option, Display Repository DOI. This DOI is not editable.

TO CONFIGURE:

To enable automatic assignment of DOIs, contact your Aries Account Coordinator.

Go to **Policy Manager** > Add/Edit Submission Items > Add/Edit Submission Item Type.

A new Display Repository DOI setting appears when the Submission Item Type is defined as a repository item.

1. Item Type Family: Supplemental
2. This Submission Item Type is a Repository Item: Check the box next this setting
3. When steps 1 and 2 are configured, the Display Repository DOI setting appears under the existing setting, Assign Submission Item DOI. These two settings are mutually exclusive. Check the box to enable Display Repository DOI.

Reporting Enhancements

Two EAR Submission Item Type Tables Added

The Submission Item Family table and Submission Item Types table, both currently available through General Data Export, are made available in Enterprise Analytics Reporting (EAR).

TO CONFIGURE:

No configuration is necessary. Users with reporting permissions on a publication using Enterprise Analytics Reporting will see the two new tables in the drop-down list of tables and views.
