

# tm Task Manager

Editorial offices often need to assign and complete tasks associated with submissions while they are still in the editorial process and have not yet moved to production.

Task Manager (TM) works seamlessly with Editorial Manager® (EM) to enable editorial task workflows for EM users, regardless of access to ProduXion Manager® or other production tracking services.

Users of Task Manager can—for the first time ever—assign and track important editorial tasks prior to production and at any time in the editorial workflow, without access to a production tracking system. Tasks can be completed in parallel and can be assigned only as relevant. Examples of editorial tasks include:

- ✓ Language edits
- ✓ Copyright check
- ✓ Preprint server deposit
- ✓ Artwork quality check
- ✓ Conflict of interest deposit
- ✓ ...and more!
